

Find the true cause of the allergy

The true cause of an allergy symptom can be a mystery. Is it one allergen or, more likely, the total load of several offending allergens that triggers the reaction?

ImmunoCAP[®] is a quantitative specific IgE blood test that can help you get a precise answer to your patient's allergen profile with invaluable information when it comes to diagnosis, prognosis and follow-up. Use ImmunoCAP, in conjunction with case history in order to give reliable advice for prescriptions and avoidance recommendations - and consequently improve patient well-being.

Allergy blood test - be sure, be safe. Learn more at www.isitalergy.co.za
